

World Farmers' Organisation 2023 General Assembly

SUN CITY, SOUTH AFRICA
WFO GENERAL ASSEMBLY
21-24 MAY 2023

The [2023 WFO General Assembly](#) will take place **from May 21 to 24!** in the [Sun City Convention Center, Rustenburg, South Africa](#).

The event is organised in collaboration with the **WFO Members Southern African Agri Initiative (SAAI), African Farmers Association of South Africa (AFASA)** and the **Wildlife Ranching South Africa (WRSA)**.

For those who will not be able to attend in person, also this year, the WFO General Assembly will **simultaneously be broadcast online**.

INVESTING IN FARMERS' SOLUTIONS FOR RESILIENT FOOD SYSTEMS WITH POSITIVE IMPACT ON NATURE

This year's theme is: ***"Investing in farmers' solutions for resilient food systems with positive impact on Nature"***.

The 2023 Annual Meeting will focus on **the nexus between agriculture and nature**, highlighting the **critical role farmers and their local solutions on the ground can play to address the global challenges of transitioning to resilient food systems** generating a tremendous and **positive impact on the nature** around us.

The **#WFOGA2023** will bring farmers from all over the world on the stage together with high-level representatives of governments, private sector entities, research centres and academia, international organizations and financial institutions **to look for synergic responses leveraging farmers' solutions.**

ABOUT THE WFO GA

Annually attracting **over 300 attendees from over 60 different countries** across the globe, the **WFO Annual Meeting** is a first-of-its-kind opportunity for **farmer leaders and other food systems stakeholders worldwide to meet and engage in forward-looking dialogues on enhancing local farmer-driven solutions to global challenges.**

It is **a unique occasion** to listen to and talk with farmers' representatives and other agricultural sector stakeholders from all corners of the world to share ideas and experiences on challenges and opportunities for a sustainable and thriving farming sector.

ABOUT THE WORLD FARMERS' ORGANISATION:

WFO, the World Farmers' Organisation, is a member-based organisation, representing a community of geographically balanced entrepreneurial farmers, that regardless of their size (small, medium and large-scale), gender, and age aims to see their role as food producers and economic actors, globally recognized. The mission of the WFO is to advocate for the global farming community in international processes impacting the present and the future of the agricultural sector.
