

The Sustainable Livestock Journey

Informing National Pathways for More Productive, Sustainable and Equitable Food Systems

Tuesday, 25 July 2023, 13:30-14:30 CEST, Ethiopia Room

Background and objectives

A coherent policy framework, coordinated institutional approach and stakeholder involvement are crucial for the livestock sector to meet the rising demand for animal-based food and achieve positive social, economic, and environmental outcomes. The session will discuss international consensus on livestock issues and priorities and offer insights into on-the-ground developments. By adopting a food system lens and sustainable practices, the sector can drive transformative change towards more productive, equitable and sustainable food systems.

Expected outcomes

1. Raise awareness of the significance of policies and multi-stakeholder involvement for sustainable livestock development.
2. Enable data and knowledge exchange to support countries in addressing the rising demand for animal-based food.
3. Promote a holistic approach that includes all relevant stakeholders, recognising the interconnectedness of social, economic and environmental considerations in livestock farming.

Moderator

Ms Cynthia Mugo

International Livestock Research Institute

Speakers

H.E. Mario Arvelo

Steering Committee of the UN Decade of Family Farming
